

Update from Rockland County Department of Health regarding the 2018 Measles Outbreak Updated 11/15/2018

All Children 6-12 months of age should receive an MMR vaccine. This will not count towards the usual vaccination and will need to receive their normal vaccine at 12-15 months and 4-6 years as well

All children 12 months or older should have a dose of MMR as soon as possible if they are unimmunized

All patients 12 months or older should have a second dose of MMR as soon as possible as long as 28 days or more have passed since their first dose

This is a **Rockland County** wide recommendation meant for children **who live in or go to school/day care in Rockland County.**

There has been no update to guidelines from the Bergen County Department of Health
